

CASE STUDY

Immediate Interim CTO to remediate and roadmap portco's tech stack

INDUSTRY: Technology: software
BUSINESS TYPE: B2B

CHALLENGE

A PE firm VP came to us with an immediate need for an interim CTO for their recent healthcare TPA acquisition. Having recently closed on the portco, they were looking for an individual that could help them remediate and roadmap the company's tech stack. They urgently needed an individual that could modernize the tech stack and focus on cyber remediation so that the PE firm could then move forward with other value creation plans at the portco. They were in need of someone with coding skills, experience working with TPAs, experience working under HIPPA compliance, and availability to work on site.

RESULT

Within 24 hours of the initial scoping call, the PE firm was introduced to the first identified exact-fit interim CFO for their needs. After being presented with the select few options, the client selected their ideal choice. The PE firm was able to confidently engage the individual who immediately began road mapping and remediating the portco's tech stack, allowing the PE firm to quickly move forward with further value creation plans.

SOLUTION

Leveraging our founder's 20 years in private equity, we have extensive frameworks for assessing PE-grade interim CTO needs. BluWave utilizes technology, data, and human ingenuity to pre-map, assess, monitor, and maintain deep pools of interim CTOs that uniquely meet the private equity standard. We interviewed the PE firm to understand their specific key criteria and then identified three select pre-vetted interim CTOs from our invitation-only Intelligent Marketplace that fit their exact needs.

“The interim CTO BluWave connected us with was very competent - we give him a big thumbs up for sure.

- VP at PE Firm
